- Special Events Speaker for seminars at Pumper & Cleaner Expo
- Special Events Consultant for several companies across the country
- Patent #6598242B1 (The Only Flat Vacuum Tank, 18 years in use and development).

Additional Information:

Robert Denome is the owner of Crescent Tank Mfg. and has also owned and operated a service business consisting of 350 portable restrooms and 12 special event trailers. Robert was looking for one vehicle that could serve as a service and a pick up/delivery truck. He came up with the flat tank design, which he patented. With him owning his own portable restroom business it gave him hands on experience with the rectangular vacuum tank and with the ability to improve the product. It is not very common to see a manufacturer of a product in the same business the product is produced for. Crescent Tank Mfg. has been manufacturing rectangular vacuum tanks for the past 18 years with over 500 tanks in the industry today.

This one and only rectangular vacuum tank allows you to carry portable restroom units, hand wash stations along with other miscellaneous items on the bed of the tank and the lift gate. This makes the product very versatile, a service vehicle along with a pick-up and delivery vehicle all in one. Crescent Tank Mfg has a three year warranty on the vacuum tank. The other components such as pump, hoses, valves, etc are warranted through the manufacturer of those parts.
